

DIGITAL MARKETING

Description

The process of the code is to simulate a real-time process automation strategy in supporting Digital Marketing in Social Media platforms. To help carry out the process better, an eclectic range of social media platforms are selected such as LinkedIn, Facebook, WhatsApp, Twitter, and have also given preference for the user to select his platform of interest. The method of recording responses is done through a google form with defined questionnaire pertinent to the platforms to align data ensuring the right content is posted.

Google sheet Link:

https://docs.google.com/forms/d/e/1FAIpQLSdS6o8mqikXUX1Q7MjLVv8uzP2h-utPtzJzXISuRTt7oJaffA/viewform?usp=sf_link

Spreadsheet ID : 13i1DHjxRHyENDTLS-BO2-X8E3JQNXxpRvwRkoW7HECU

Argument	Type	Required	Default Value	Description
type	Text	Yes		Enter the default browser for opening the webpage [Chrome, Firefox]
email	Text	Yes		Enter the operator's email here
pwd	Text	Yes		Enter the operator's password here
to	Text	Yes		Enter the email of the user to whom the message is to be sent
subject	Text	Yes		Enter the title of the message
message	Text	Yes		Draft your email
Id	Text	Yes		Opens up the required google spreadsheet with the required id for performing operations
result	Text	No	 result	Name of a variable where the command's result will be stored
if	Bool	No	true	Executes the command if the expected condition is true
timeout	Timespan	No	 timeoutcommand	Specifies time in milliseconds for GIANT.Robot to wait for the command to be executed

errorcall	Procedure	No		Name of the procedure to be called if an exception is called or timeout has occurred
errorjump	label	No		Name of the label to jump to when the command throws an exception or when a given timeout expires
errormessage	Text	No		Message to be shown if an error occurs or timeout exceeds
errorresult	Variable	No		Name of a variable that will store the returned exception. The variable will be of error structure
search	Text	Yes		Indicate the program to search with the necessity arguments (xpath, id, class, etc...)
by	Text	Yes		Gives the program a mode to look for the id for the desired search option

Standard Operating Procedure

The below mentioned steps indicate the standard protocol for which the program runs:

- The operator first sends a mail to the company/start-up/organization/an external agency requesting for which platforms are to be posted. The responses are collected on a google form which is linked with an inbuilt googledocs spreadsheet. This spreadsheet will be the source of parsing in the values to the robot.

Permission to post applications on your platform

name@company.com

Permission to post applications on your platform

Sir,I introduce myself as XYZ. We wish to promote your product in [platforms](#). Kindly fill the google form and wait about 6 hours to around 1 business day to ensure your product advertisements published.(Google Form:
https://docs.google.com/forms/d/e/1FAIpQLSdS6o8mqikXUX1Q7MjLVv8uzP2h-utPtzJzXISuRTt7oJaffA/viewform?usp=sf_link
Thank You,
Best Regards
Team XYZ

- Using the googlesheet.find option, the robot detects the platforms for which the advertisements are meant to be posted. For multiple platforms, the user has to click for more than one option to ensure accurate reading of all the platforms

GOOGLE DOCUMENT

Digital Marketing your Advertisements

This google form allows the user to select options to ensure on which platforms their advertisements must be posted. Note the posting of these advertisements would take a minimum of 6 hours to around 1 business working day depending on the number of platforms

* Required

Name of the company *

Your answer

Platforms in which advertisements have to be posted *

☐ LinkedIn

☐ Instagram

☐ WhatsApp

☐ Facebook

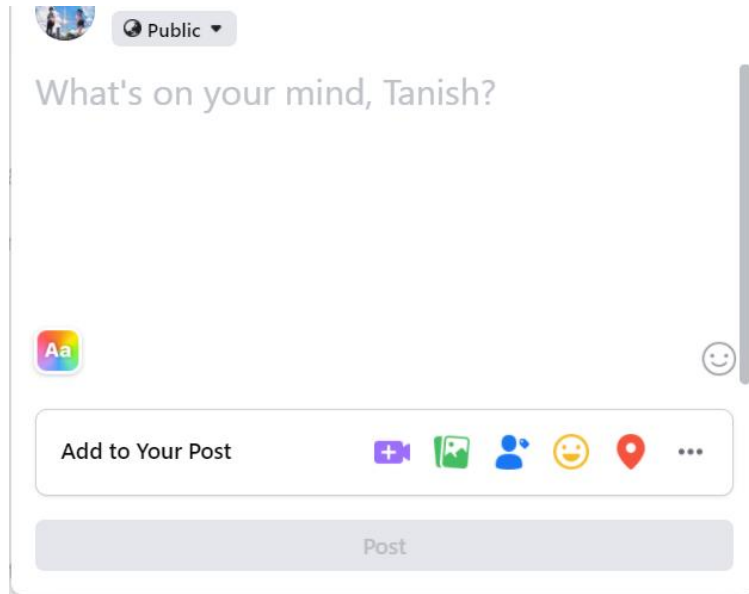

☐ Twitter

☐ Others

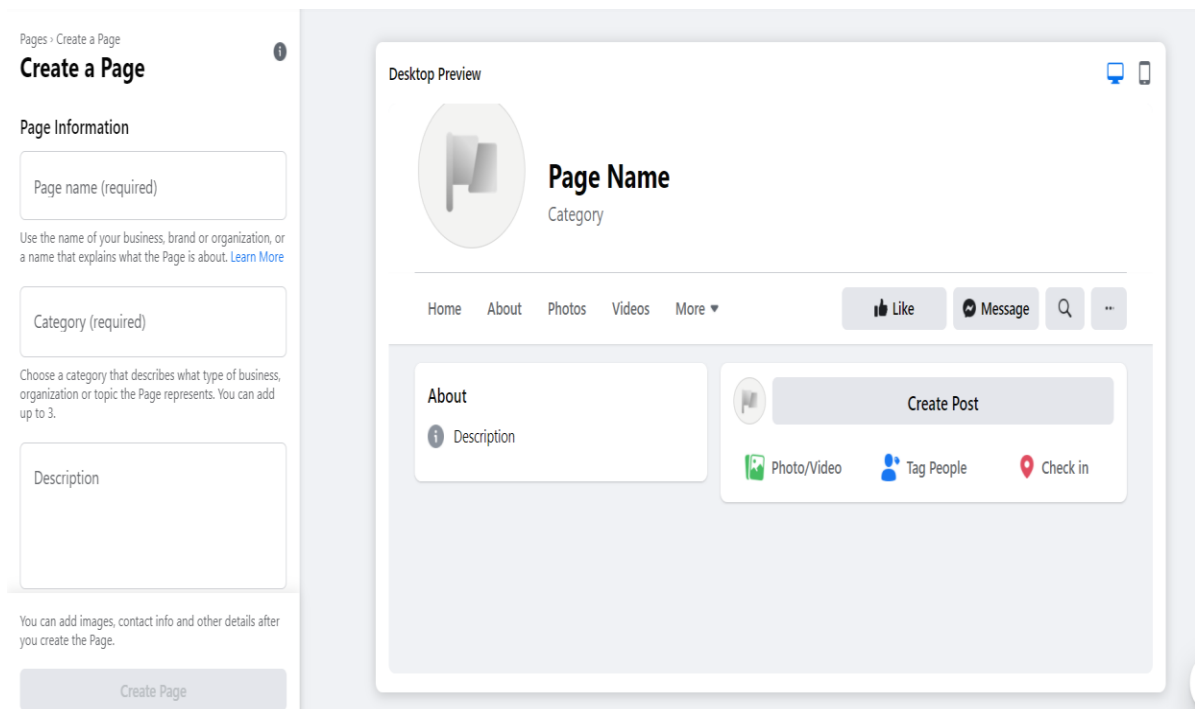

- For the detected platform, the robot starts with performing all the pre-requisite operations starting from posting to adding connections. In an event of adding pictures, the user must provide URL of the ID which will be parsed in with the robot as a picture URL for posting the same on any of the social media website.
- On account of the ID, based on the row and column of the spreadsheet, the robot can detect the content and will post accordingly to minimize errors.
- For generating advertisements, Facebook business ID is being used for which any amount transaction (if any) is done through the mode of payment : PayPal or PayTM. Note: For any unsuccessful transaction, we have ensured the user gets intimated the same, and the necessary steps would be done to ensure a smooth process.
- The cycle then periodically repeats itself to traverse through the google form for the entire day. In order to reduce complexity, once the process is completed, the google spreadsheet will close to erase previous data and creates a new spreadsheet to begin a new process.
- In case of a failure in the internet connection, the delay period mentioned would take care of any unnecessary interruptions during the execution process ensuring simplicity.

FACEBOOK POST

PAGE

ADVERTISING

The screenshot shows the Facebook interface for managing an RPA page. At the top, there's a search bar and navigation icons. The left sidebar contains a 'Notifications' section with three items: a general update about creating a new post, an ad review notification, and an admin change notification. Below this is a 'Manage Page' menu with options like Home, Inbox, Resources & Tools, Notifications (2 new), Insights, Publishing Tools, Ad Center, Page Quality, Edit Page Info, and Page Settings. The main content area displays the RPA page profile, including the cover photo, profile picture (a blue circle with a white 'R'), name 'RPA', and bio 'Create @Username · Robotics Company'. There's a blue 'Add a Button' button and a navigation bar with 'Home', 'Events', 'Reviews', 'More', and 'Promo'. At the bottom, there's a section titled 'Invite Friends to Like Your Page'. The browser's address bar shows the URL 'https://www.facebook.com/RPA-110038354156656/quality/' and the taskbar at the bottom shows various application icons.

NOTES:

- The above code will create a post on the platform specified by the customer in the google docs.
- If **Facebook** platform is chosen, then the customer need to give further details for creating a page and advertising the product given as a paragraph option in Google forms.
